The Revolution In Sound Engineering Is Here.

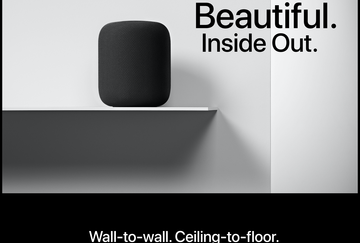
The new SoundDeck Pro is a breakthrough speaker that adapts to its location and delivers high-fidelity audio wherever its playing.
Together with voice assistance, it creates an entirely new way for you to discover and interact with music at home.
And it can help you and your whole family with everyday tasks — and control your smart home — all with just your voice.

Small yet Powerful

The SoundDeck Pro has a Surround 360 degree design whichhelps it out perform high end speakers even 3 times it volume and size.
The Condensed tweeter array and dual sub woofer system makes sure that there are no compromises in the sound quality. The SoundDeck Pro is power packed and never fails to deliver on entertainment.

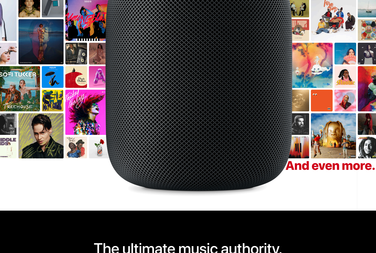
Deep bass with range you can feel.

A six-microphone array, along with an internal bass-EQ microphone, analyzes and compensates for the effect of the room on the bass response, providing rich, consistent sound.



Wall-to-wall. Ceiling-to-floor. Its room-filling sound.

Place SoundDeck Pro anywhere in the room. With spatial awareness, it automatically analyzes the acoustics and adjusts the sound based on its location. Direct sound, including the main vocals and instruments, is beamed to the middle of the room, while ambient sound is diffused into left and right channels and bounced off the wall. So the entire space is filled with rich, well-defined tones.



The ultimate music authority.

The SoundDeck Pro works with all major music streaming services and podcast vendors. With AI and Machine Learning and access to over 60 million songs, it learns what you like and helps you discover more music you'll love. And that takes the listening experience to a whole new level.

Redefining Sound. Since 2011

Our Founders

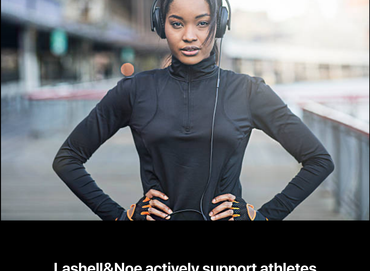
Jimmy Lashell
CEO & Founder

Timothy Noe
CTO & Founder

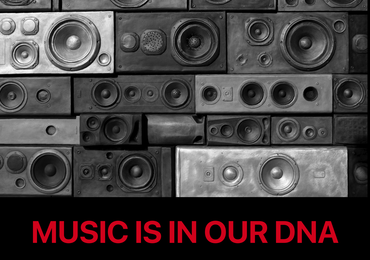
Our founders, Jimmy and Tim or Lashell&Noe as they are more commonly known as, always dreamt of creating great music in their childhood.

Both of them started out as indie artists and later formed the band Delta, breaking into the Top20 Young Musicians Of The World List in 1983.

As successful musicians, both then forayed into the Audio market with Lashell&Noe. Lashell&Noe has done groundbreaking work for both musicians and casual music lovers alike.



Lashell&Noe actively support athletes and indie artists and bands through various support and partner programs and outreaches.



MUSIC IS IN OUR DNA

Lashell&Noe creates world class Audio products.
Our philosophy is that Good Music eliminates geographical boundaries and unites the world.
